Date Paste

Date Paste is considered a very important food item in many parts of the world. Similar to milk, honey and grapes, Date Paste is infested with plenty of vitamins and minerals that are vital for our health development. In fact, a date fruit has 25% more potassium than i.e. bananas while being free of fats, sodium, and cholesterol. The same quality nutrients are reflected in it's by products like Date Paste and date powder.

The Deglet Noor date paste keeps your calorie count and blood sugar range in check. Thus, Paste plays an important role in the diet and treatment of obesity. Further, due to the pectin, dietary fiber and syrupy substance of date, Date Paste can find a plethora of applications as a thickener or gelling agent too in processed foods, i.e., confectionery products, jams, table jellies, soft cheeses, yogurts, etc.

Date paste is also an alluring sweetener with all the qualities of sugar without any loss of flavor and other sensory characteristics. Date paste is also used in the preparation of a variety of foods to enhance taste. Whether it's mixed in a salad or baked into a delicious date muffin. This naturally sweet desert treat is also used to produce various food products like cubes, syrup, spreads, liquid sugars, sugar powder and energy-bars.

Date paste is largely used as a thickening and gelling agent in different types of processed food products like jams, jellies, soft cheeses, yoghurts and various confectionaries like cookies, cakes, breads and muffins.

More and more energy- and muesli-bar manufacturers are moving towards a more health oriented market by offering products with natural ingredients and no additives. Due to our date paste capabilities as a natural binding agent, its texture and malleability allows it to absorb other ingredients. Our Deglet Noor date paste is unique in this and can't be compared with other date paste from common dates.

The best way to see how our date paste fits with your other products is to ask for samples from us and explore the vast possibilities that date paste offer food industries.
